

MALARKEY COOL ROOF PRODUCTS ELIGIBLE FOR LOS ANGELES DEPARTMENT OF WATER & POWER CONSUMER REBATE PROGRAM

The Cool Roof Rating Council (CRRC) states that a cool roof reflects and emits the sun's heat back to the sky instead of transferring it to the building. Certain Malarkey shingles and roofing products reflect solar rays, which may reduce the amount of heat entering your home and can result in lower attic temperatures compared to standard shingle colors.

These products are given Solar Reflective Index values by CRRC and the Los Angeles Department of Water & Power (LADWP) elects to give rebates for products based on these values.

Malarkey Roofing Products® provides this information to assist Los Angeles residents in applying for a rebate.

The following Malarkey low- and steep-slope roofing products are eligible for a **\$0.20/sq. ft.** rebate based on their 3-year aged (weathered) Solar Reflective Index (SRI) values. SRI values are tested and labeled by the Cool Roof Rating Council (CRRC).
