

MALARKEY EXPANDS RESIDENTIAL SHINGLE LINE IN OKLAHOMA CITY

PORTLAND, Oregon – April 24, 2014 – Malarkey Roofing Products® will be expanding the residential shingle line manufactured at their Oklahoma City plant in May 2014. The expansion will add the traditional 3-tab Dura-Seal™ 25 AR as well as SBS enhanced 10” and 12” Hip & Ridge Strips featuring Scotchgard™ to the list of products manufactured in the Oklahoma facility. The new product line introductions follow the recent addition of the Class 4 impact resistant Legacy® shingle to the plant production line in December 2013.

Malarkey Roofing Products expanded their production to the Midwest in 2012 with the addition of the Oklahoma City manufacturing facility. The new location provided over 60 jobs in the facility, as well as further support to the local economy through the sourcing of all manufacturing equipment and raw materials from within a 250-mile radius of the plant. Since the opening in 2012, Malarkey has continued to expand the plants manufacturing line and looks forward to the ongoing growth within the Midwest community.
