## **MALARKEY ROOFING PRODUCTS RELEASES THE VISTA™ NEXGEN™ SHINGLE**

PORTLAND, Oregon – November 4, 2016 – Malarkey Roofing Products has introduced the new Vista™ Nexgen™ polymer modified laminated architectural shingle. The new polymer modified shingle is fortified with Nexgen™ polymer modified asphalt technology for enhanced granule adhesion and extreme weather protection.

Over the years, Malarkey has continually advanced polymer modified asphalt, using new technologies to refine the physical characteristics desired for quality shingle performance. Nexgen™ utilizes a blend of Flexor™ asphalt with reclaimed post-consumer recycled polymers.

Malarkey uses reclaimed polymers as the next step of an ongoing effort to promote sustainable roofing materials, while maintaining a high level of quality. This progressive approach improves the shingle characteristics of asphalt flexibility, granule adhesion, cold weather installation, and impact resistance while supporting sustainable product design.

The Vista™ includes a UL 2218 Class 3 impact resistance rating and increased security against algae staining. The product is available in four vibrant colors: Midnight Black, Natural Wood, Storm Grey, and Weathered Wood. The color selection will continue to expand to offer an enriched color palette.

For more information on Malarkey Roofing Products, or to find a representative, call 800.545.1191 or visit [WWW.MALARKEYROOFING.COM](http://WWW.MALARKEYROOFING.COM).
