**FOR RELEASE: January 30, 2017**

## **MALARKEY ROOFING PRODUCTS EXPANDS THE VISTA™ SHINGLE COLOR OFFERINGS**

PORTLAND, Oregon – Malarkey Roofing Products®, the premier North American building materials manufacturer, expands the color offerings for the Vista™ shingle line with four new colors.

The new colors, Antique Brown, Heather, Sienna Blend and Silverwood, have been added to the existing colors of Midnight Black, Natural Wood, Storm Gray and Weathered Wood for a total of eight colors in the product category. Images of the new colors are [now available on the Malarkey website](#).

The Vista™ Algae Resistant (AR) shingle, introduced by Malarkey in 2016, is comprised of specially formulated granules for increased security against algae growth. In environments where algae growth is prevalent, black streaks can stain a roof surface. The Vista™ additionally utilizes Nexgen™, a polymer modified asphalt technology made from sustainable, post-consumer materials. The polymer modified asphalt technology provides enhanced granule adhesion and extreme weather protection. It is certified for Class 3 impact resistance which can withstand impacts from simulated hailstones over one inch in size.
